You've had a Lakewood guitar for a long time and now you cannot find it within our guitar range? Maybe you are luckier here. . . This is a list of older guitar models that have been taken out of the series program. Most of them are still available via our customshop.
Crossover is the magic word. We merge the geometry of the Lakewood M model with an overall construction optimized for nylon strings and get a guitar that holds its own perfectly between the worlds of classical and fingerstyle. The tone of this instrument is predestined for pop, Latin and folk. The woods used follow the classic selection for spruce and rosewood.
